Transform Your Space, Quick and Easy Home Improvement: Interior design is the art and science of enhancing the interior of a building to create a healthier and more aesthetically pleasing environment for those who use the space. An interior designer is someone who plans, researches, coordinates and directs such improvement projects. An interior designer is a multifaceted profession that includes concept development, space planning, site visits, scheduling, research, communication with project stakeholders, construction management, etc., and project execution.

Past and Present

Typical interior of one of the houses in the Vlkolínec Folk Architecture Park (Slovakia)

In the past, interiors were designed instinctively as part of the building process.[1]

The interior design profession is a consequence of societal evolution and the complex architecture resulting from the development of industrial processes.

The pursuit of efficient use of space, user well-being and functional design has contributed to the development of the modern interior design profession. The interior design profession is separate and distinct from the role of interior decorator, a term commonly used in the United States. The term is less common in the UK, where the interior design profession is not yet regulated and is therefore not, strictly speaking, an official profession.

In ancient India, architects were also interior designers. This can be deduced from the mention of the architect Vishwakarma, one of the gods of Indian mythology. In these 17th-century Indian architects and house designs, carvings depicting ancient texts and events can be seen in the palaces, while in medieval times wall paintings were a common feature of palatial dwellings in India, commonly referred to as havelis. Although most of the traditional houses have been demolished to make way for modern buildings, there are still around 2,000 villas in the Shekhawati region of Rajasthan[2] where the murals can be seen.

In ancient Egypt, "soul houses" (or model houses) were placed in tombs as receptacles for food offerings. From this, details of the interior layout of various residences of
