Address: **4310 West Ave,, San Antonio, TX 78213, San Antonio, Garland**

Price: **Free**

The Key Spiral SB/LA Implants Features: Why we use SB/LA – Sand blasted with Large Grit Acid Etched? When discussing the Implant surface treatment from a sales point of view it is important to note that most Implant companies have a similar surface treatment to SB/LA and should not be the major focus of the conversation:

There are only two companies who use a certified SB/LA surface treatment. Ritter is one of them.

Ritter Implants was the first to develop the SB/LA surface on Grade 5 with KKS in Switzerland and it was proven successful.

Titanium Grade 5 with SLA is still the very best surface treatment in the world.

Faster Healing questions – this is a marketing myth – if your son breaks his arm, how long does it take to heal? Every person heals differently and the only way to measure if an Implant is fully healed is through a Cone Beam CT scan. Capable of measuring the Hounsfield units at the surface of the Implant.

Ritter Implants are made of a “Grade 5” Titanium alloy (Ti6AL4VELI: 90 % Titanium, 6 %
