Virtual Instances in Liferay DXP - Enabling Multi-Tenancy: When organizations expand their digital presence across multiple brands, regions, or business units, managing them efficiently becomes a challenge. This is where virtual instances in Liferay DXPCome into play. They allow businesses to create and manage multiple independent portals each with its own users, themes, and configurations under a single shared Liferay installation. This setup ensures centralized control while maintaining individuality and data separation for each instance.
