API Testing Tools Come with Improved Test Coverage: Karate Labs provides intuitive and all-in-one API testing tools that come with accelerated release cycles, increased test coverage, faster bug fixing, and minimized maintenance. Such automated testing tools for API bring overall cost savings for the business by mitigating the requirement of manual testing and offering quicker release cycles. By detecting and resolving bugs earlier in the development process, this testing helps to avoid expensive rework while ensuring optimum quality of the product. Unlike the GUI tests, such automated API tests bring reduced maintenance, as they are not affected by the alterations in the user interface.
