Get Broader Test Coverage with Parallel Testing Platform: Do you need an open-source code tool for merging API test automation? No worries, visit Karate Labs to find the easy-to-use parallel testing platform. This exclusive API testing delivers a wide test coverage area as it simultaneously assesses an application using discrete devices, browsers, and environments. The testing comes with multiple API tests concurrently to reduce the entire test evaluation time. Such unique API testing offers fast-tracked feedback, as using API parallel tests assists in recognizing the glitches faster. Additionally, the testing solution offers continuous integration and functions, assisting developers to quickly test updates for new code. Speak to our experts at (+44) 7900225047.
